

DESIGNING EFFECTIVE ONLINE COURSES

Roadmap

1

Module 1: Workshop Welcome

You might start out feeling like you're driving in the fog at first, but it will become clearer as we go along! This is the course welcome! Learn about the course structure and create your instructor welcome video.

Module 2: Foundational Concepts

Communication is at the heart of teaching, so we'll dig right in and begin working with our forums and discussion tools while we take a look at some principles of course design.

2

3

Module 3: Course Analysis

Learn how to conduct a situational analysis, create a course concept map, and write measurable learning outcomes all while leveraging the backwards design model.

4

Module 4: Creating a Synchronicity Plan

Take a look at online modes of instruction and instructional strategies to help you decide when to meet with students at the same time, in groups, or one-on-one.

5

Module 5: Assessment Strategies

Create your online assessment strategy aligned with your course learning outcomes and learn how to use available technologies to do this effectively!

6

Module 6: Instructional Strategies

Identify the strategies for making your course content engaging and accessible to all of your students while also learning the ins and outs of copyright.

7

Module 7: Student Engagement and Interaction

In this last stop in the course, we'll take a look at how to build online relationships with your students and how to create an inclusive course environment.
