

MODULE 3

Learning Outcomes

By the end of Module 3, you will be able to:

- Conduct a situational analysis
- Create a concept map of your course
- Describe the levels of Bloom's Taxonomy
- Develop specific and measurable learning outcomes for your course

TEACH

Learn how to write effective learning outcomes and use Bloom's Taxonomy

CREATE

Conduct a situational analysis, make a concept map, begin your course design matrix

DISCOVER

Discover concept mapping tools, infographic tools, and interactive presentations

Course Analysis

In Module 3, you'll apply the backward design model to the design of your own course. You'll start by completing a situational analysis, then create a course concept map to better define your course modules or topics, and finally learn how to write measurable and specific learning outcomes.
